

Autonomous driving, ADAS, Shared Mobility, Connected Cars, Car2X, Mobility as a Service - the new era of mobility has already begun. Right in the middle of it, NAVENTIK develops a software-based localization technology with integrated GPS receivers. It addresses the requirements of highly automated and autonomous driving and guarantees both safety and quality standards.

As a pioneer and driving force of future mobility, we have been recognized as the regional most innovative automotive start-up. Following our successful market entry, we now want to grow by further developing and implementing our solutions. Are you ready to revolutionize mobility? Then join us as

## SENIOR SOFTWARE ENGINEER (M/W) AUTOMOTIVE

FULL-TIME, OPEN-ENDED, LOCATION CHEMNITZ

### YOUR TASKS

- ▲ Implementation of algorithms in the field of signal processing and sensor fusion with your team
- ▲ Active and result-oriented leading of projects in pre-series development
- ▲ Requirements specification and management for product development

### REQUIRED SKILLS

- ▲ After studying computer science, engineering or natural sciences, you have several years of professional experience in the software development in a technology company
- ▲ You program very well in C/C++ or C#
- ▲ You like to take responsibility and motivate your team members

### WE OFFER

- ▲ A modern working environment in what is probably Chemnitz's most beautiful office
- ▲ Scope for co-design & long-term development in a solidly financed start-up
- ▲ Training in direct cooperation with the founders
- ▲ An attractive compensation package, flexible working hours & diverse team events
