

Autonomous driving, ADAS, Shared Mobility, Connected Cars, Car2X, Mobility as a Service - the new era of mobility has already begun. Right in the middle of it, NAVENTIK develops a software-based localization technology with integrated GPS receivers. It addresses the requirements of highly automated and autonomous driving and guarantees both safety and quality standards.

As a pioneer and driving force of future mobility, we have been recognized as the regional most innovative automotive start-up. Following our successful market entry, we now want to grow by further developing and implementing our solutions. Are you ready to revolutionize mobility? Then join us as
