

NAVENTIK

POSITIONING SOLUTIONS FOR
VEHICLE AUTONOMY

Autonomous Driving, ADAS, Connected Cars, Car2X, Mobility as a Service ...
... the automotive industry is currently rapidly changing!

We drive this change as one of the most innovative Tech Startups in Germany.

Our mission is to provide: POSITIONING SOLUTIONS FOR VEHICLE AUTONOMY!

You want to be part of our mission and work with us in the most beautiful office in Chemnitz,
without kicker tables, but with unique engineering spirit?

Then join us as

C++ Integration Engineer **Customer Projects**

Full-time, Open-ended, Location Chemnitz

NAVENTIK's OFFER

- ✔ The big chance to start your career in a solidly financed startup
- ✔ The opportunity to develop yourself towards being an automotive software and vehicle localization expert
- ✔ Flexible working hours that support a good work-life-balance
- ✔ An attractive salary & a modern working environment

WHAT YOU BRING

- ✔ You have a bachelor or master degree in MINT (Mathematics, Computer Sciences, Natural and Engineering Sciences and Technology) or you convince us with your programming skills if you do not have a degree
- ✔ You are experienced in C++; alternative programming skills as C, C# are desired
- ✔ You have good German and English language skills, further languages are a plus
- ✔ You are "hands on" and willing to travel (no long term assignments) and you can professionally represent us in front of our customers

WHAT YOU DO

- ✔ You work at software development, integration, validation and testing tasks in our customer projects (in house and worldwide at customers site (<20 % of time))
- ✔ You support our core development teams in the feature development and change management based on customer feedback
- ✔ You actively gather knowledge in the field of satellite navigation to further improve our software solutions
