

NAVENTIK

ENABLING SATELLITE NAVIGATION

FOR AUTOMATED DRIVING

Autonomous driving, ADAS, Shared Mobility, Connected Cars, Car2X, Mobility as a Service - the new era of mobility has already begun. Right in the middle of it, NAVENTIK develops a software-based localization technology with integrated GNSS receivers. Thereby, we address the requirements of highly automated and autonomous driving and guarantee both safety and quality standards.

Are you ready to revolutionize mobility? Then join us as

SENIOR C++ SOFTWARE ENGINEER AUTOMOTIVE (M/F/D)

Full-time, Open-ended, Location Chemnitz

NAVENTIK'S OFFER

- ✔ Scope for co-design, long-term development & assumption of responsibility in a solidly financed start-up
- ✔ An attractive salary & opportunities for individual further training
- ✔ Flexible working hours in a modern working environment in Chemnitz's probably most beautiful office
- ✔ A community-oriented working atmosphere with various team events

HOW TO GET INVOLVED

- ✔ You implement algorithms in the field of signal processing and sensor fusion
- ✔ You push forward development projects in satellite navigation and actively share your knowledge within the team
- ✔ You keep an eye on the entire architecture and quality requirements during software development

WHAT YOU BRING ALONG

- ✔ After a degree in computer science or a comparable qualification, you have several years of professional experience in the software development in a technology company
- ✔ You program very well in C++; alternative programming skills as C, C# are desired
- ✔ Good German language skills
- ✔ You like to bring in your experiences to motivate your team members
